

Generating APK and AAB Files (Easy Method)

Note : If you already have an app in play store and want to submit an update for it, please use the conventional method not this one.

Step 1 (if you don't have your own Keystore file): Navigate to terminal

Command to generate APK file

```
./gradlew assembleRelease
```

Command to generate AAB file

```
./gradlew bundleRelease
```

Example-----

**APK File will be generated and saved in folder
"app\build\outputs\apk\release\app-release.apk"**

**AAB File will be generated and saved in folder
"app\build\outputs\bundle\release\app-release.aab"**
