

Changing App Name, Radio URL, Social items etc.

Step 1: Open config.xml

1: change app name

2: change Radio URL

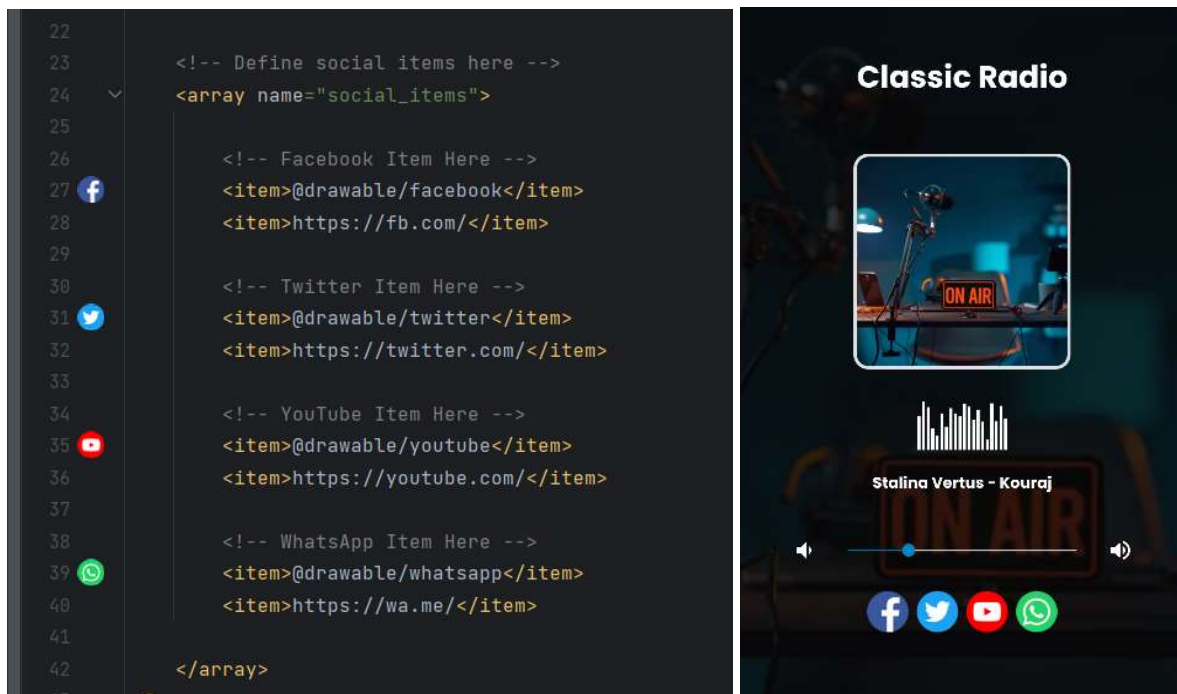

3: Enable/Disable autoplay (true/false)

4: Whether Radio Album Art is circular (true/false)

5: Background image blur amount (10-100)

6: Whether to use social icons (true/false)

Step 2 (Optional): If you choose to enable social items, do follow these steps to add your items.

For example, I want to show three items, “WhatsApp”, “Instagram” & “Snapchat”
I will add the items like this, First string will contain the item image, which is located in drawable folder
And the second string will contain the url for it.
